Free courtesy mowers, please ask for details.

For most mowers, we offer two levels of service. Please read on for more details...

FULL SERVICE

A comprehensive service of your equipment where we go through your mower in great detail. We replace all of the filters, check, adjust & lubricate all cables & linkages. We thoroughly clean your mower, sharpen & balance the blade(s), service the fuel supply system. In essence, we inspect every element of your mower and ensure that it is in full working order, ready for another year of operation. Most routine repairs will be covered within the labour charge of a full service, but we will advise you before carrying out any chargeable repairs not encompassed by the service, unless we have your advanced approval to proceed.

INTERMEDIATE SERVICE

A far more basic service, along the lines of a minor car service, where we change the oil, oil filter, air filter(s), plug(s) and sharpen & balance the blade(s). If we encounter any other problems during the service, we'll report back to you with details and a price to rectify the issue(s). This level of service is designed solely for machines that are currently in good working order, as routine/preventative maintenance. A typical domestic mower will do 50-75 hours a year - if your mower does more than this, then a full service would be more appropriate.

Prices shown are guide prices based on the average prices for routine servicing of well-maintained equipment and includes Labour, Parts and VAT. We will stop and let you know if your service goes beyond £10 the average price.
